

CX Coding Exercise

Goal

Create a basic interface that allows a user to complete certain tasks provided by the below user stories. While constructing the application keep quality in mind. This is not meant to be an exhaustive application, please do not spend excessive time to create it. This should be done using JS but not Typescript.

Stories

- As a Pokemon enthusiast I want to be able to search for the information about a specific Pokemon
- As a Pokemon enthusiast I want to be able to see the information
 - Name
 - Weight
 - Order

You should be able to pull the data needed from <https://pokeapi.co/>

When complete please send the link to your github project back to your Kapitus HR contact. If you have any questions also feel free to reach out with those questions.
